Jose Antonio Angulo Cánovas

Platform Engineer Expert / SRE

Madrid, Spain | joananca1996@gmail.com | +34 697 356 945 | joseantonioangulo.com

Currently in Adidas's CDN team, managing Akamai services and Cloudlets. Previously in Observability (2022-2026), with experience in Kubernetes, AWS OpenSearch, log pipelines and automation.

PROFESSIONAL EXPERIENCE

Adidas

2022 - Present

Platform Engineer Expert / SRE | Teams: CDN and Observability

CDN | 2026 - Present

Joined the CDN team in 2026, managing Akamai services including Cloudlets.

Tools: Akamai / Cloudlets

Observability | 2022 - 2026

- Reduced the AWS OpenSearch bill by 40-60% by migrating to OR instances and reducing index replicas from 1 to 0.
- Replaced Fluentd with Vector in Kubernetes, reducing CPU and memory consumption by 40%.
- Automated shard adjustment for teams with different data volumes, targeting a maximum size of 30 GB per shard to support consistent operation.

Tools: AWS, OpenSearch, Kubernetes, Fluentd, Vector, Prometheus, Grafana, Kafka, Jenkins, Bitbucket, Terraform

NTT Ltd

2020 - 2022

Service Support Delivery Engineer | IGAE | Madrid

Part of the monitoring team for IGAE, Spain's Intervención General de la Administración del Estado.

- Implemented Elasticsearch, Logstash and Kibana from the ground up for IGAE (Intervención General de la Administración del Estado).
- Set up log collection and organised ingestion with Logstash.

Other responsibilities: Managed Nagios XI and developed monitoring plugins. Administered Grafana and NagVis.

Tools: Elasticsearch, Logstash, Kibana, Nagios XI, Grafana

PROFESSIONAL EXPERIENCE | CONTINUED

Deloitte

2019 - 2020

Delivery Analyst | Madrid

Worked with enterprise data platforms, licensing and reporting tools.

- Built a team-wide SharePoint site to centralise resources and make them available across the team.

Other responsibilities: Managed Qlik Sense Server licences. Monitored data with Power BI and Qlik Sense.

Tools: SharePoint, Qlik Sense, Power BI, Jira

Repsol

2019

Systems Administrator | Cartagena Refinery

Maintained refinery equipment and administered monitoring, virtualisation and backup systems.

- Created a Nagios and Centreon monitoring system covering all refinery equipment, together with an advanced alerting setup.

Other responsibilities: Migrated the monitoring environment to Centreon 19.04. Upgraded Acronis Backup from 11.7 to 12.5. Administered VMware ESXi, vSphere and Linux systems.

Tools: Centreon, Nagios XI, VMware, Linux, Acronis Backup
